However, I'm going to take you through some of the most prominent new features on a more intimate level... – *Apple Pencil*: This is a pen-shaped stylus from Apple that simulates a Fingerprint in many ways. Adobe has two versions of this update, one for the iPad Pro and the other for all other Apple devices. You don't need a specific version if you're not using an iPad Pro. Just pick the one that best fits your device. – *Breadcrumbs*: You can quickly jump to a specific part of your workflow by clicking on a section of a project. You also have the ability to create a kind of trail by going back and forth the steps. This feature works on the desktop and on mobile.
